

## SCARF Changes from 2004-05 to 2005-06

Revised September 26, 2005

We are finishing up a major overhaul of the SCARF documentation. Very little has changed in the way of technical information other than those changes that were discussed at the annual SIS coordinators meeting. Below is a list of the major revisions, hints, and information to review and integrate modifications.

The 2005-06 summer submission must be processed before we can run the fall fourth week submission, therefore we would like to have the summer submission processed a week or two before the deadline for the fall fourth week.
