Summary Report for UGWG on an Affiliation Model and Multi-Campus System Model of University Governance
The affiliation model of University governance would transfer authority for at least two and possibly three or four of the TRU institutions from the OSBHE to the new Board of Trustees of Oregon State University. The chief executive officer would be the President of Oregon State University. No separate system office. TRU CEOs would report to the OSU president and the OSU Board of Trustees.
The Multi-Campus System

• Maintain State Board of Higher Education as governing body for two to four of the TRU institutions.

• A separate system office would remain in place, but with reduced responsibility and staff.

• TRU CEOs would report to the system CEO, whatever his or her title.
Governance factors/comparative criteria:

1. Achieving goals
   - Statewide achievement metrics
   - Student success
   - Regional services
Governance factors/comparative criteria:

2. Enhancing quality

• Strategic Investment
• Centers of Excellence
