AGENDA ITEM – OCCCIR Data Request

To: Joint Boards Articulation Commission

From: Karen Carter for OCCCIR

At the quarterly OCCCIR (Institutional Researchers) meeting, the group decided to formally ask JBAC to make a request for data so I am sending this to you to put on the agenda.

To provide needed information on the success of students transferring to OUS schools, OCCCIR is requesting unit record information at the course level from OUS to determine the effectiveness of education at community colleges. This information would provide program level feedback to our faculty to determine if they are adequately preparing students to be successful in subsequent course work at OUS schools. For example, will a student who has completed Chemistry at a community college level be successful in subsequent Chemistry courses at an OUS school.

Currently community colleges receive aggregate data which does not allow for this analysis.
